South Africa

Objective : Provide standardized systems and accessories for U.S. operations, including warehousing, storage, inventory and asset management, service tag tracking and same day emergency dispatch. Also provide support for non-IT purchases both domestically and internationally.

Needs Assessment : IPA provides a variety of options for the client to review when determining company-wide standards. Taking into account functionality and pricing, IPA is able to find solutions to meet the budget and requirements. Test unit can be provided for a variety of solutions.

Equipment & Supplies : Laptops; Desktops; Servers; Accessories including docking stations, monitors, keyboard & mouse combos, etc.; Spare Parts & more.

Supply Chain & Logistics : IPA offers a tailored solution to meet the domestic and international requirements of the NGO. Goods are inventoried and tracked from the moment they arrive until the moment they depart the IPA warehouse facilities. Custom packaging is determined on the nature of the goods and the destination. IPA offers domestic transportation via scheduled LTL or courier services and international shipment via air, sea, truck, rail and/or international courier. In order to maximize freight budgets, shipments are also consolidated for same destination delivery when possible.

Support & After-sales : IPA coordinates inventory and asset management for all items. IPA also facilitates any necessary warranty and / or repair issues. IPA maintains master lists of all asset and service tag numbers for future use.
