Time Period	: April 2016
Location	: Democratic Republic of the Congo
Contract Value	: USD 15,997.42

Professional Staff Allocated

Barry Kroon – Managing Director (USA)

Charlie Thian - Project Coordinator (USA)

Eric Miller – Project Coordinator (USA)

IPA worked with the international NGO in the Democratic Republic of the Congo to provide an X-ray machine for regional initiatives.

	Planning: IPA consulted with the international NGO to determine project needs and choose an x-ray machine best suited to the regional environment and specific initiative in DR Congo.
	Procurement: IPA audited several manufacturer specifications and provided the international NGO with several product options to enable them to choose one best suited for their program.
	Pre-Shipment Services: IPA considered geographic sourcing options to minimize delivery charges as well as transit time.
	Logistical Solutions: IPA offered a logistical solution that was both cost effective and efficient for the international NGO in DR Congo.
	After-Sales Support: After delivery, IPA continues to provide supplies and consulting that support long-term mission goals. For medical programs, we often supply consumable items for years to come.
