**Contract Value** : \$152,000+

**RELIABLE SUPPLY CHAINS**

Formerly:  Since 1983 

**Professional Staff Allocated**

Jeremy Jagger– Project Coordinator(USA)  
Ashley Bachman– Project Associate II(USA)

## Maldives

**Project objective:** To supply medical lab equipment to the international NGO in Maldives.

**Logistical Solutions:** RSC inspects, consolidates and arranges delivery in accordance with commodity guidelines and restrictions. For the laboratory equipment, we utilized a freight forwarder to arrange air freight and ocean freight shipments, as well as assist in the clearance of the goods, once they arrive in country. The goods were packed in accordance with the temperature and hazmat guidelines. For cold pack shipments, we utilize ice packs, dry ice and insulated shipping cartons for shipments, depending on temperature requirements.
